# Heavy Duty Smart Padlock

- Anti-cutting stainless steel cover for shackle.
- True keyless solution. Operation via bluetooth even without the need for any network connectivity.
- Full audit trail allows visibility on access/duration records.
- ~ 5-year battery life; replaceable battery.
- Magnetic bypass port on the bottom of the lock in case lock power failure

## Durable and Strong

Made with Stainless Steel SUS304 Hammer, Pull and Drop Tested

## Long Life Replaceable Battery

Up to 18,000 operations

## Weather Resistance

All our locks are individually and 100% tested to IP66 standard

## Data Analytics

Generate critical data reports

## Compatibility

- Bluetooth V4.2
- iOS 12 or higher
- Android 5.1 or higher

# Extra Heavy-Duty Smart Padlock

- Bigger; more robust lock design and quality
- True keyless solution. Operation via Bluetooth even without the need for any network connectivity.
- Full audit trail allows visibility on access/duration records.
- ~5-year battery life; replaceable battery.
- 3 layer of power backup:
  - 1<sup>st</sup> Layer: Replaceable Battery
  - 2<sup>nd</sup> Layer: Super Capacitor in case of power failure
  - 3<sup>rd</sup> Layer: External Magnetic Bypass port

## Durable and Strong

Made with Stainless Steel SUS304 Hammer, Pull and Drop Tested

## Long Life Replaceable Battery

Up to 14,000 operations

## Weather Resistance

All our locks are individually and 100% tested to IP68 standard and CEN 3

## AES Encrypted

Each lock and virtual key is 128Bit AES Encrypted

## Compatibility

- Bluetooth V4.2
- iOS 12 or higher
- Android 5.1 or higher

# Logistic Smart Padlock

- True keyless solution. Operation via bluetooth even without the need for any network connectivity.
- Full audit trail allows visibility on access/duration records.
- Lighter weight with Zinc Alloy lock body
- Able to withstand vibration of a moving car

## Durable and Strong

Made with Zinc Alloy lock body with high quality plastic shell

## Long Life Battery

Up to 18,000 operations - 2 Years

## Weather Resistance

All our locks are individually and 100% tested to IP67 standard

## Data Analytics

Generate critical data reports

## Compatibility

- Bluetooth V4.2  
- iOS 12 or higher  
- Android 5.1 or higher

# Smart Cabinet Locks

- Designed to easily retrofit existing cabinets and/or data racks.
- Operation via bluetooth even without the need for any network connectivity.
- Input for external door closure sensor with full audit trail allows visibility on access/duration records.
- Internal checks within system to ensure cabinets are closed and locked.
- Emergency protocol - SNMP remote unlock + Emergency external power input (5V) in case of power supply to cabinet lock failure.

## Durable and Strong

Made of durable stainless steel and encased in Zinc diecast

## Operating Voltage

Powered via DC5V with USB-A slots to power the lock in case of power outage

## Weather Resistance

All our locks are individually and 100% tested to IP65 standard

## AES Encrypted

Each lock and virtual key is 128Bit AES Encrypted

## Compatibility

- Bluetooth V4.2  
- iOS 12 or higher  
- Android 5.1 or higher

### TRUE KEYLESS SOLUTION

Operation without the need for any physical keys or 3rd party mechanisms

### SMART ACCESS CONTROL SYSTEM

Intelligent yet simple with real-time platform to support enterprises of any scale

### TRACKING WITH FULL AUDIT CAPABILITIES

All operation are logged for accountability and traceability

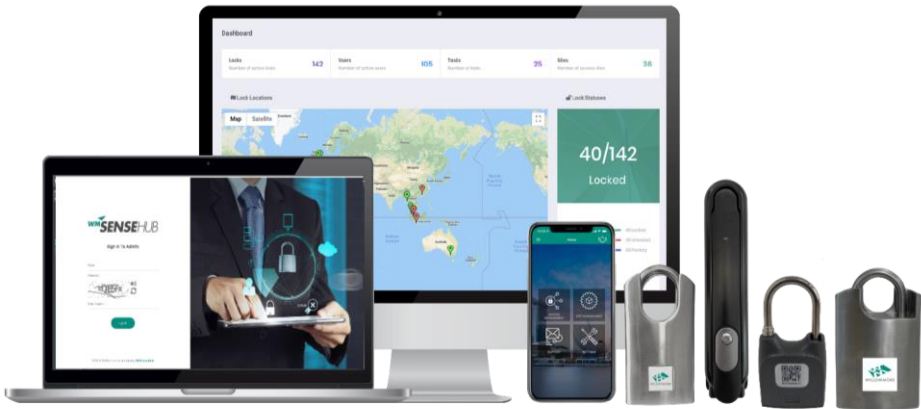

### BENCHMARKING OPERATIONAL EFFICIENCY

All operation duration is logged to set benchmark duration for each task

# WM SENSEHUB

## Access Management Control System

### SECURE & CONVENIENT

Operation via Bluetooth ensures assets are accessed only by authorised personnel

### MOBILE AND WEB PORTAL ACCESS

Authorise and secure smart lock digital tokens easily via web or mobile

### RESTRICTING ACCESS

Authorized users and lock are grouped together to limit access and heighten the security of assets

### DATA ANALYTICS

In-built engines allow easy generation of daily/weekly/monthly data reports
